Autumn leaves woven by deciduous trees

400 Municipal Cherry Trees

## CAPTURE MITSUKE

One of the best parts of traveling is taking pictures of beautiful scenery. Those photos will be your own memories.

Citizen's Forest

Mitsuke is one of the leading knitwear production areas in Japan.

Mitsuke has flourished as a textile city since ancient times. Especially for knitted products, it is one of Japan's leading production areas and supported Japan's fashion industry through repeated technological innovation in all eras.

Mitsuke knitting began around 1933. Immediately after the end of the war, production areas rapidly began to form. In the 1950s, buoyed by the era of high economic growth, Mitsuke knit industry grew significantly.

Experience expert technology up close!
